

# HEALTHY & SAFE ON TRANSIT

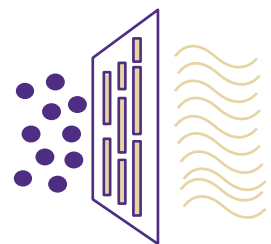

## WHAT TRANSIT AGENCIES ARE DOING

Daily vehicle disinfections will continue to be standard practice on transit vehicles.

Safety partitions have been installed between drivers and passengers on transit vehicles.

Upgraded air filters were added to transit vehicles during the pandemic and will continue to be used.

## WHAT YOU CAN DO

Passengers are required to wear masks. Mask dispensers are being installed on transit vehicles.

Maintain distance from other passengers when possible when on vehicles and while waiting for transit to arrive.

Pay with an ORCA card or U-PASS for easier and healthier fare payment on transit.
