

# RIDESHARE SAFE PRACTICES

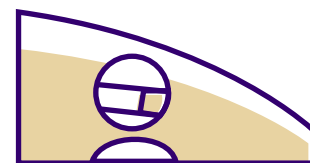

Follow these guidelines to protect yourself and others from the spread of disease and illness.

Complete the COVID-19 employee symptom attestation every day before entering the vehicle to commute to campus.

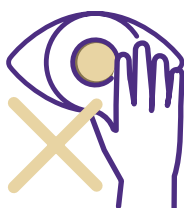

Wear a mask and gloves at all times within the vehicle or in the presence of another person outside your household.

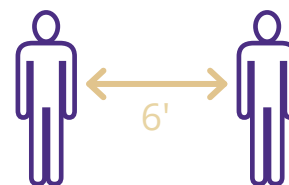

Ensure proper ventilation within the vehicle by keeping windows slightly cracked and avoiding cycling air through the vehicle.

Clean and disinfect high-touch surfaces on a daily basis with an EPA-registered disinfectant.

Avoid touching your eyes, nose and mouth with unwashed hands.

When in the vehicle, avoid close contact with fellow commuters.
